

Assurance at your Doorstep

Before taking delivery of your LPG (cooking gas) refill cylinder, please

- Check that the cylinder seal is intact.
- Your LPG delivery man carries a weighing scale. Always get your refill cylinder weighed in your presence before taking delivery.
- The weight of the empty cylinder (15.3*kg) is painted on its body (as shown in the picture.)
- Add the product weight (14.2**kg) to the empty cylinder weight to arrive at the gross weight.
- The gross weight should match the weight shown on the weighing scale.

Issued in public interest by
